Lactase Enzyme Drops, Lacteeze

\$17.50

(RRP \$18.95)

type=input,subtype=TEXT,width=40,height=018.95

You Save: \$1.45

Lacteeze Drops can be used to reduce lactose in fresh milk, reconstituted milk, canned condensed milk, breast-milk, infant formula, creams, chocolate milk and any other fluid milk products.

Lacteeze drops are suitable from birth and contain no gluten, no dairy, no preservatives, no artificial colours and no flavours.

Lacteeze Drops are very convenient to use. Just add 5 drops to 1 litre of milk or other fluid milk products, mix and leave in refrigerator for 24 hours.

For breastfeeding mothers: expressed breast milk can be used by adding 15-20 drops to 1 litres of milk and leaving for 12 hours. This will convert a minimum of 80% lactose.

- 7ml
- 15.5ml

IngredientsLactase, glycerin.

HOW TO USE LACTEEZE DROPS

Lacteeze Drops can be used to reduce lactose in fresh milk, reconstituted milk, canned condensed milk, breast-milk, infant formula, creams, chocolate milk and any other fluid milk products.

Milk that has been converted with LACTEEZE drops has a slightly sweeter taste although nutritionally the milk is not affected.

LACTEEZE drops are available in 7ml and 15.5ml sizes.

Directions for Use Cowâ€™s milk

Simply add 5 drops of LACTEEZE to one litre of milk, stir well and leave in the fridge for 24 hours prior to consumption. This will convert 70-80% of the lactose.

If you wish to convert more lactose, you can increase the number of drops used or leave the milk in the fridge for longer.
