You Save: \$5.00

Calcium ascorbate is a non-acidic form of vitamin c and helps to reduce free radical damage to cell membranes. It may help to maintain immune function and alleviate symptoms associated with histamine reactions. Vitamin c is also used to enhance the absorption of dietary iron and the maintenance and repair of skin and connective tissue.

**Main Uses** Reducing the severity and duration of cold symptoms relief of the symptoms of allergies and hayfever relief of the symptoms of mild upper respiratory tract infections

- Helps maintain the body's general resistance to colds, flu, allergies and hayfever
- Supports the body's normal resistance to mild respiratory tract infections
- Aids tissue repair and wound healing
- Used in the growth and maintenance of healthy bone, cartilage and teeth
- Gives the body a high dose of vitamin C, without the acidity that can irritate a sensitive stomach

- 100g
- 250g

**Directions for Use** recommended adult dosage 1/2 to 1 teaspoonful dissolved in water 2 times a day or as advised by your healthcare professional.

**Medical Caution** Not to be used in children under two years of age without medical advice. If symptoms persist consult your healthcare professional.

- Each 1 gram powder contains:
- Calcium ascorbate 1000mg equiv. ascorbic acid 826mg
- 1 teaspoonful = approximately (4g) 4000mg
